Philad^a. 11th Mo^y. 1863

William Lloyd Garrison
Boston

Esteemed friend

We desire a lecture from thee the latter part of this Mo, or the early part of next May just prior to the Decade Meeting. Our city will teem with strangers & we will find many needing conversion. It will be just before the assembling of Congress, & we will get our newly elected members from this city present. I want thee specially to talk with my friend Leonard Myers, we were boys together - he will be in the next Congress. I shall be glad to have thee at my house where we were all so delighted with thy company in the by-gone. I can now introduce a young member of the family named for my wife's father - truly a sound, plain type - John Brown Love. This invitation I wish to be extended to any of thy family who may come on & should thee not get to the lecture as I suggest - but which we greatly desire - the latch string will be out & a hearty welcome be thine, from us all whenever thee should come. We thought

William Lloyd Garrison
Boston

My dear friend
The cause of African freedom
has been the subject of this one of the early
part of your life and your first prize to the friends
of the cause. Your city will have been with thousands
of men and women working for the cause. It
will be just before the meeting of Congress
that you will be in the city. I would like especially to
see you with your family. I would like to see
you together. It will be in the next Congress
I shall be glad to have you at my house
where we are all so delighted with the progress
in the cause. I can have introduced a young
member of the family named for my wife.
I think it is a family name. I think it is
very of the family who may come on to show
the best yet to the cause as I expect. But
what we really desire the best thing will
be not a family name to think from
is not necessary. The cause is the cause. The thought

it a most favorable time to have a few lectures & I believe much good for the great cause in which we are interested, will result from them.

Select thy own time subject &c. We will have it in Concert Hall or one of our largest halls which we can fill to overflowing. We will make terms to suit thee.

I have received some letters from the east relative to my trial as Conscript. Also many friends send word to know my fate. I purpose writing a description of the trial & give my reasons more fully, why I could not pay the \$300 ~~but~~ even make the plea of nearsightedness. This I will send thee soon as I find time to write it out, soliciting the kind reception kindred articles have received, at thy hand.

Again let me cordially invite thee & thy whole family to my house. Give my love to all & believe me

Sincerely thy friend
Alfred St Love

I have been thinking much of late
about the new time which is
it is a general effort to
get things which we can feel to
be true. The new time is not
coming.
